CONFLUENCE 2019

on

“Law & Technology in 4.0 Economy”

by

IFIM Law School & IFIM Business School, Bangalore

In association with

Comparative Legislation Society, Paris, France

26th February 2019,

Hotel Taj Vivanta, MG Road Bangalore

In the current economic landscape, law, business and technology increasingly intersect and leaders in industry, regularly deal with significant changes to business models and technological possibilities. The industry 4.0 technologies (Artificial Intelligence (AI), Robotics, Blockchain etc) influence business, tech and legal trends in innovation market. For example: How can law firms ensure that their business strategies align with clients’ business and technology interests? What policies should tech -focused start-up adopt to protect customers data from AI powered hackers? How can a Tech -company make sure that its business practices and strategies comply with emerging national & international legal regulation?

It is noteworthy that while on the one hand these technologies provide an opportunity to innovate across systems and processes, it also raises major concerns within the legal & regulatory framework that revolve around issues such as privacy, cyber security, legal liability, enforcement of regulatory laws etc. In the backdrop of the emergence of **AI & Robotics** as a next generation technological innovation and the concerns it raises for the industry, *IFIM Law School and IFIM Business School, Bangalore* in the association of *Comparative Legislation Society, Paris, France*, is organizing the International Conference on **“Law & Technology in 4.0 Economy”**, on the 26th February 2019.

The interface of law & regulation, business of innovation and industry 4.0 technologies brings many challenges and opportunities for market leaders. This conference aims to facilitate a

discussion on legal and regulatory aspects and policy and business challenges for these technologies from a national & global perspective. It also invites policy discussion on interface of Law and Technology in *Cyber security* and *Automate vehicles* sectors from industry and interdisciplinarity perspective.

The conference is the first of its kind to be held in India and is aimed to bring the industry on a common platform to initiate discussions within the realm of legal issues arising from the use of emerging technologies in 4.0 industry. The conference will be attended by CTO/CISO and General Counsels of top tech focused Indian and global corporations, leading laws firms, start-up founders and senior officials from regulatory bodies.
