the Worst Thing to Happen to Humanity”
- Stephen Hawking

About IFIM

17th Best Law School and 10th Best BB.A LL.B Program offered in India as per Careers360 Survey 2019.

IFIM Law School is situated amidst the IT Hub of Bengaluru. A law school with contemporary and progressive curriculum with emphasis on experiential learning delivered by accomplished faculty members. It aims at nurturing the hopes, aspiration of the students and have a tradition of inviting eminent legal luminaries to guide us and our students about legal arena. International Conference on Artificial Intelligence is one such initiative to guide students and create awareness among the society.

We are living in the era of Artificial Intelligence. Everything from marketing to advertising, banking, and even your smartphones are governed by AI.

However, while AI has its advantages there have been major concerns within the legal framework around issues such as privacy, legal liability, enactment and enforcement of regulatory laws etc. In the backdrop of the emergence of AI as a technological innovation and the concerns it raises, IFIM Law School, Bangalore is organizing the first International Conference on the intersection of AI with Data Privacy, Decision making tool and Regulatory framework.

Panel Discussion

1) AI and Data Privacy

The huge amount of data collected and used by corporations and governments – is it for the greater good, or is it a cause for concern? Emergence of a new concept always shakes the system to its core but does it mean entry should be banned or balance should be brought through controlled regulation?

2) AI as Decision Making Tool

Imagine an AI on the Judge's Bench. Is it too revolutionary, or is it the exact kind of objectivity and freedom from emotional instability that we need? Can Explainable AI bring a perfect AI Judge? If so, in case of error can AI be made responsible or the legal system?

Agenda
